# Who am I?

Kurt Schwimmbacher
231002

I am a student at the Open Window Institute where I double major in User Experience Design and Development. I am also one of the coleaders of the Open Window Dungeons and Dragons club.

In my free time I do graphic design, play guitar and drums, and play games.

TERM 1 PROJECT

Project Overview

This project, called Adventurer's Almanac, is a dashboard style website designed to view and compare the statistics related to the game Dungeons and Dragons.

The project makes use of the Dnd 5e API (https://5e-bits.github.io/docs/api) to fetch the data related to classes in the game to compare them against each other on the Compare page and as they level up on the Timeline page.
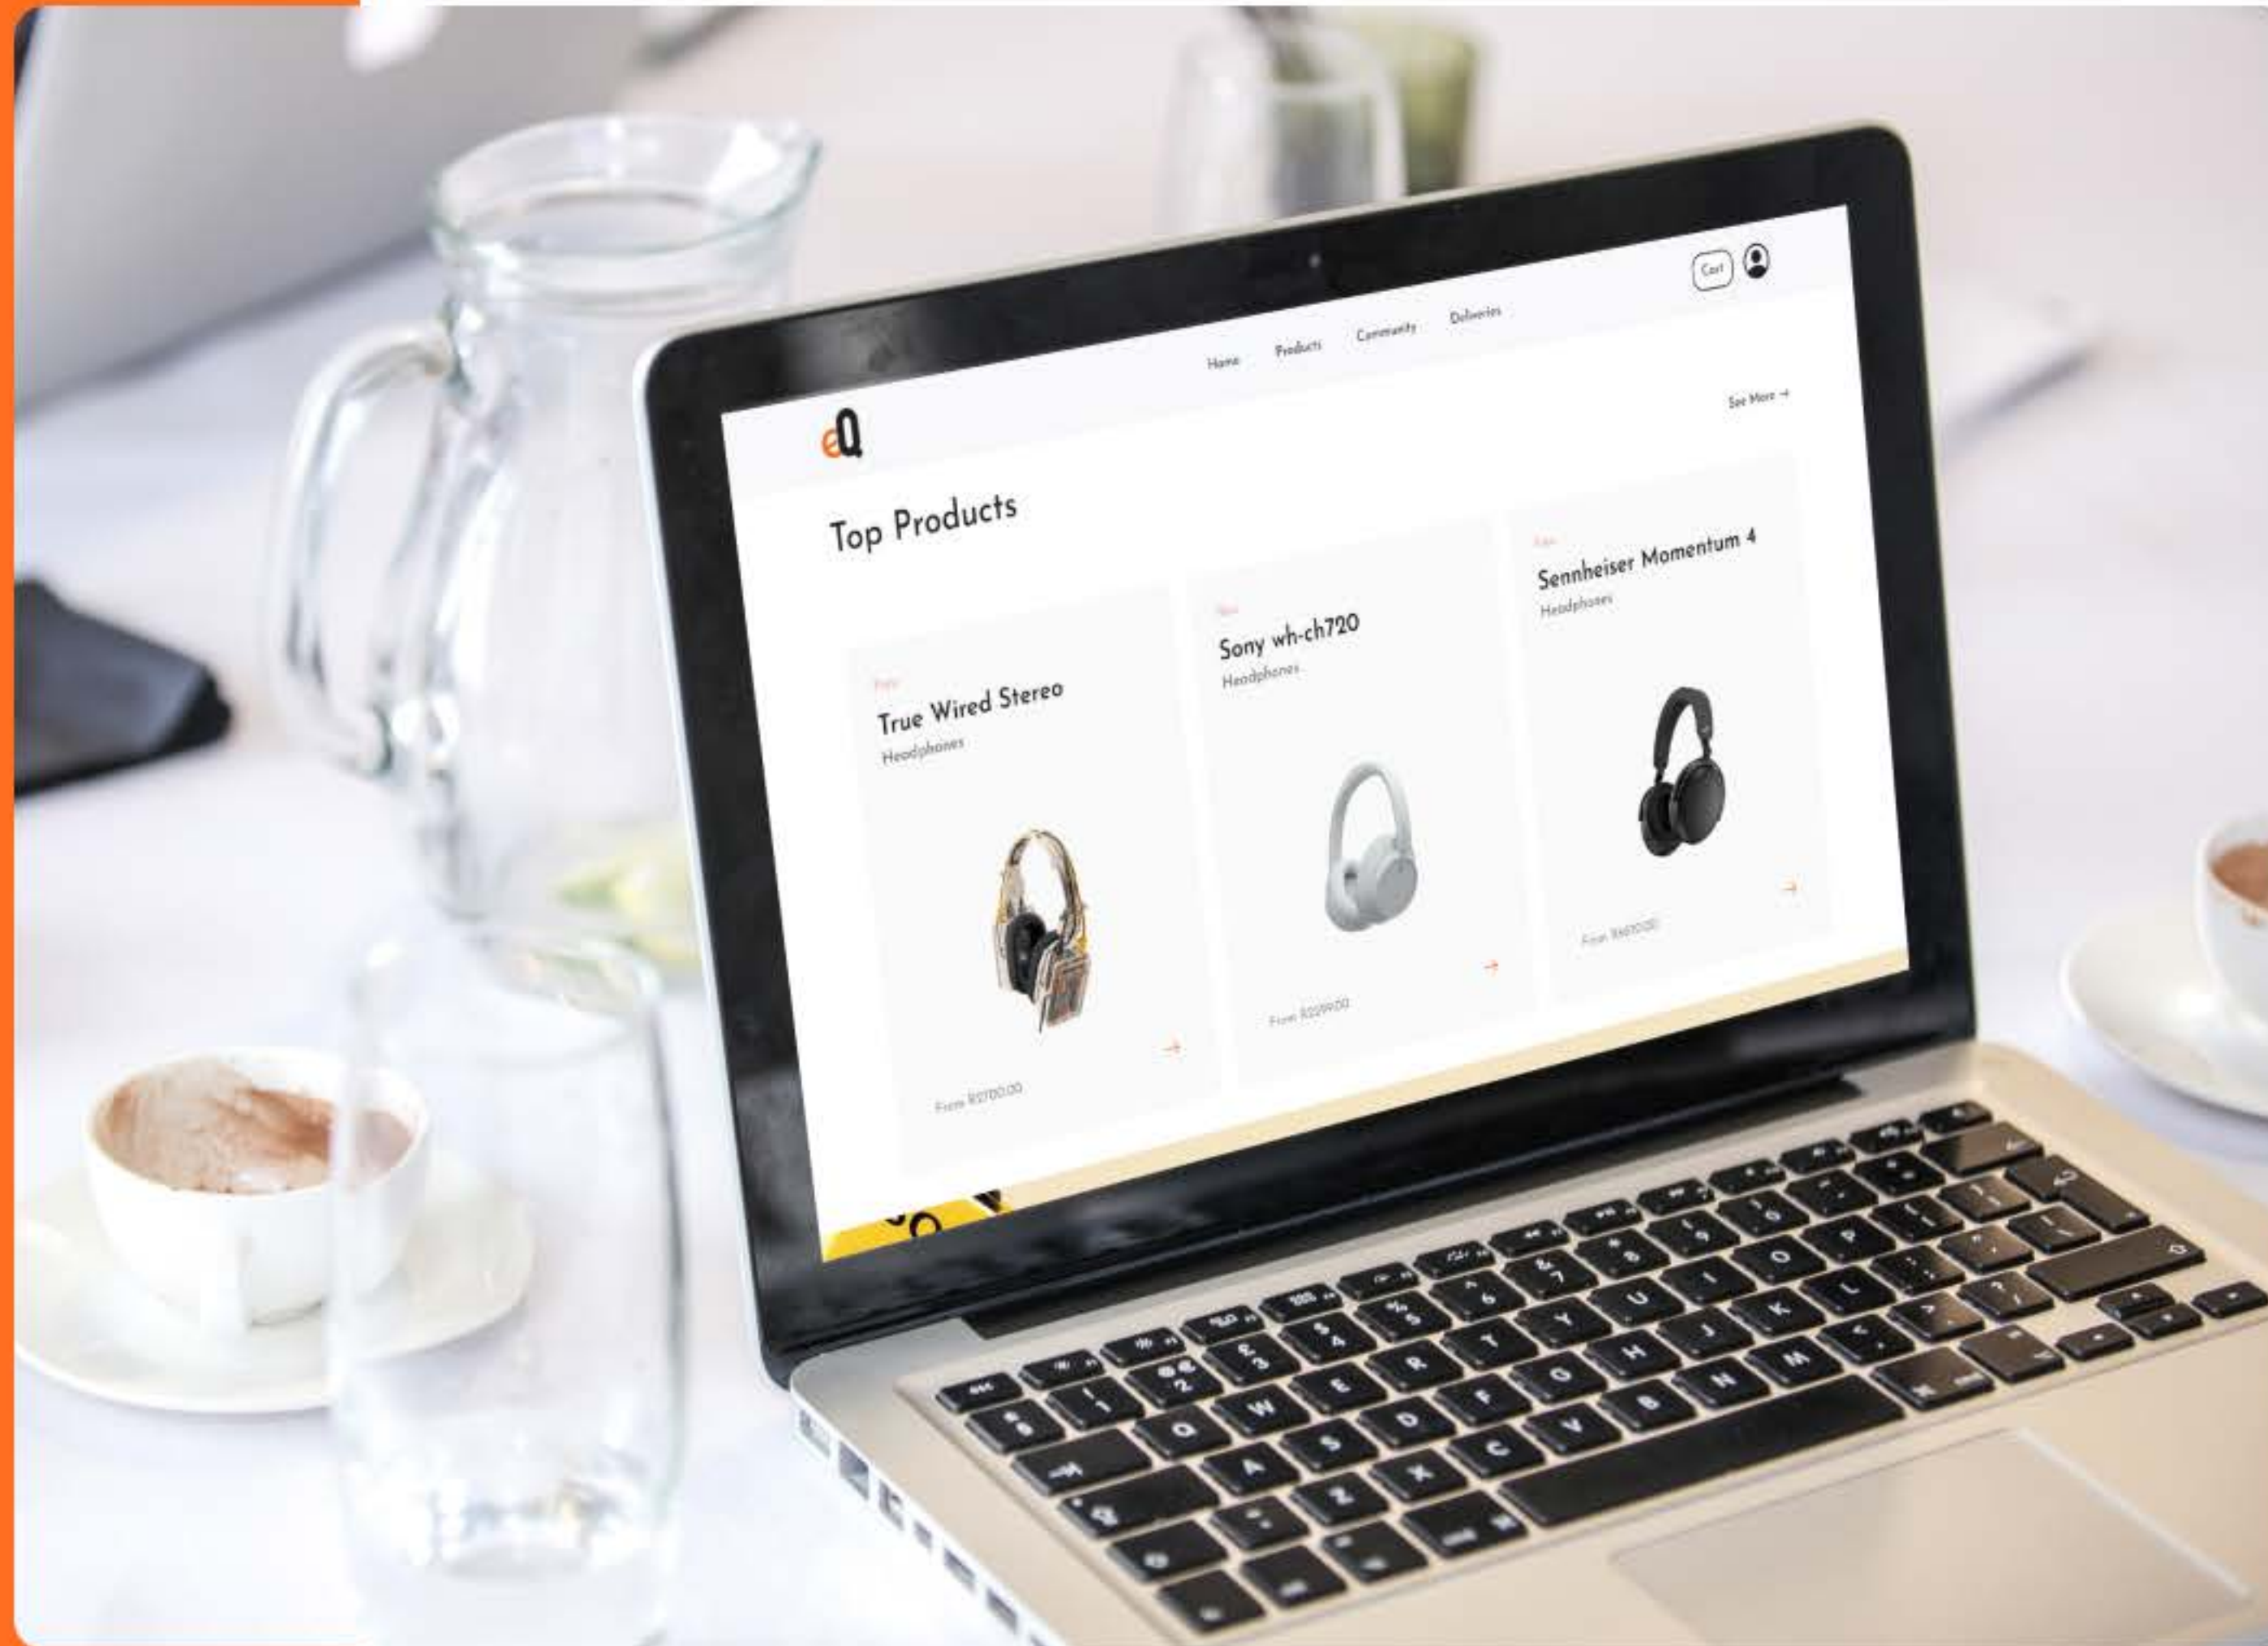

This project was made using React and Chart.js to display the data.

Term 2 Project

Project Overview

This project, called EQ, an audio equipment E-Commerce site designed to allow users to post, view, edit, and purchase headphones, speakers and other equipment.

The project is a MERN Stack application, and includes flows for user authentication, checking out products in cart, commenting on products, and adding products to a Wishlist.
